EXPERIENCE

Fullstack Developer

03/2025 - 07/2025

Aircharter / Freelance

Project: Development of a private jet booking platform

- Designed custom WordPress plugins to manage bookings, airport data, and real-time search results.
- Integrated a secure Java backend with the WordPress frontend via RESTful APIs.
- Continuously maintained and enhanced the technical architecture to ensure performance and scalability

Results:

- 40% reduction in billing time through automation.
- Significant improvement in data accessibility for non-technical teams.

Graduation project – Fullstack Developer

03/2024 - 08/2024

Ilemgroup / Casablanca

[Link](#)

Project: "Inventaire vCenter" Application for Cloud Resource Management

- Developed a fullstack web application using Spring Boot and Angular, integrating Azure AD for authentication.
- Implemented a RESTful API for integration with VMware vCenter, enhancing VM management.
- Designed a change tracking system and user action history logging.

Results:

- 40% reduction in billing time through automation.
- Significant improvement in data accessibility for non-technical teams.

Final Year Project – Web Developer

06/2023 - 10/2023

6SOLUTIONS / Casablanca

Project: Online Price Comparison Website

- Developed an online price comparison platform using Java and Angular.
- Implemented scraping algorithms and data analysis to provide real-time price comparisons.
